PRESERVED LT / LU VEHICLES – A FURTHER UPDATE ON THE UPDATES!

by Paul Raven-Hill

This is a follow-up to my previous articles of "Preserved London Underground Rolling Stock" in *Underground News*. I would like to thank those LURS Members who contacted me with details and additional information on vehicles that had not been included in the original article, simply because they were "under the radar" and were not mentioned on any of the websites I had used for research. Below is an updated list, with the additional vehicles shown in **BOLD** font, where details have come to light or have been updated, particularly with the addition of the surviving ex-IOW Island Line Class 483 (1838 Tube Stock) cars, most of which have entered preservation in some form:
