

ROLLING STOCK CHANGES AND MOVEMENTS

1992 TUBE STOCK:

CENTRAL LINE IMPROVEMENT PROGRAMME (CLIP) DOOR OVERHAUL AND PROGRAMME LIFT (DOPL)

It should be noted that CLIP and DOPL are running as separate production lines at Acton Works. However, DOPL works are being carried out on CLIP trains on the CLIP production line and thus there are two production lines – CLIP & DOPL and DOPL only. Of course, the DOPL only works are running at a faster rate than CLIP, and for reporting reasons the CLIP and DOPL trains are being given both a CLIP and DOPL train number (which, apart from trains 1 and 2, are different) despite being one train.

The situation to date so far is thus as follows with the relevant mod numbers:

CLIP TRAIN 1 / DOPL TRAIN 1:

	91111-92111	93446-92446	93222-92222	91263-92263
Out of service Ruislip	29.11.18	26.04.19	04.09.20	04.09.20
Ruislip to Derby	05.12.18	09.05.19	21.01.21	20.01.21

Ruislip to Acton Works				
Acton Works to Ruislip				
In service				

Above: Exterior and interior view of the first completed CLIP train, which was actually CLIP train 3. CLIP train 1 / DOPL train 1 (units 91111+93446+93222+91263) is the third completed CLIP train, which is currently anticipated to enter service in September after its final depot testing and on the line. A fourth CLIP train is expected later in the year.
